

CORONA HELP GUIDE

Due to many contacts from citizens in lack of information about Coronavirus/COVID-19 in English, we have made this brochure with information and hope we can help companies, small traders, freelances, entrepreneurs, unemployed and international students effected by the current situation.

We cannot provide all the answers, you might have. Instead we can recommend, that you to take a look on all the web pages mentioned in the brochure, because updates are made very often due to the current situation.

You can also get more information in English here:

Aid packages for companies according to tax fees:

The Danish Tax authorities has stated this on their website:

On 17 March 2020, the Government and a unanimous Danish Parliament (Folketinget) passed a bill aimed at supporting Danish trade and industry as well as Danish employees and reducing the pressure on the liquidity of Danish businesses. The following changes have been adopted:

- Businesses' payment deadline for withheld A-tax (tax deducted at source) and labour market contributions (am-bidrag) is extended by four months for the settlement months of April, May and June 2020 (only applies to the payment deadlines from 30 April up to and including 10 July 2020).
- Businesses that, due to sudden events beyond their control, which could not have been foreseen, have not paid A-tax and labour market contributions for March and that immediately after the cause of non-compliance has been removed make the payment, can apply for exemption from their usual payments of interest and fees. Applications are made by completing the contact form in E-tax (TastSelv). It is not possible to apply until after the corona situation is normalised and when the due A-tax and labour market contributions are actually paid.
- The tax return filing deadline has been extended for income year 2019.
- The payment deadline is also extended for B-tax (tax not deducted from income at source) for April and May 2020, so that payment is to be made on 22 June 2020 and 21 December 2020, respectively.
- In addition, the payment deadline is extended by 30 days for three months (March, April and May 2020) for businesses which settle VAT monthly. This means that the deadline of 27 April 2020 is extended to 25 May 2020, the deadline of 25 May 2020 is extended to 25 June 2020 and the deadline of 25 June 2020 is extended to 27 July 2020.
- For businesses that settle VAT quarterly, the first and second quarters of 2020 are combined, so that the payment deadline will be 1 September 2020 for both quarters. For businesses that settle VAT half-yearly, the first and second halves of the year are combined, so that the payment deadline will be 1 March 2021 for both half-years. You must submit a separate VAT return for each individual period.
- Finally, businesses may have a tax account balance of up to DKK 10 million for a temporary period if they adjust the amount limit by or after 25 March 2020.

You find much more information and FAQ on this link:

Temporary compensation for corporate fixed expenses

More companies are currently experiencing a marked decline in their revenue because of both the COVID-19 pandemic and the measures taken to limit the spread in Denmark.

For several companies, such as restaurants, hotels and airlines, the base of the businesses has temporarily disappeared or been noticeably reduced. At the same time, companies must pay rent and other fixed expenses they must pay even if there are no customers.

The Government has agreed on a wage compensation model with the social partners and has played out a model for self-employment compensation, as well as a number of initiatives to strengthen the liquidity of companies.

There is also a need for vulnerable companies to have compensation for some of the fixed costs, E.g. the cost of irrevocable contracts.

The scheme will allow vulnerable companies to receive support to continue operations in the extraordinary situation.

The compensation scheme bases on the following principles:

Principles of temporary compensation scheme for fixed expenses, etc.

- 1. Companies across industries must be able to receive compensation.*
- 2. The compensation is targeted companies with a large drop in turnover in Denmark (more than 40 %).*
- 3. The compensation is targeted at fixed costs and the amount of compensation is between 25 and 80%.*
- 4. Compensation covers up to three months and will be payable as soon as possible.*
- 5. If turnover has decreased significantly less than the above, the compensation have to be back paid.*

Temporary compensation for self-employed

The outbreak of corona virus has already had major financial consequences. Many self-employed people face major challenges and this requires further initiatives.

The Government therefore requires a temporary compensation scheme for self-employees. The scheme means that the small self-employed, which experience a drop in increase with more than 30 % because of the COVID-19 virus, can be compensated. The Government does that to help the many self-employed businesses and small traders.

The compensation from the state is 75 % of the loss of increase, though to a limit of 23.000 DKK. each month corresponding to the rates in the salary compensation scheme for salaried Employees agreed with the parties of the labour markets partners in the tripartite agreement. The compensation can be up to 34.500 Danish kr. if the self-employee has a spouse. The self-employee or the small trader can get a maximum compensation in 3 months from the 9th of March and until the 9th of June. It is a demand that the company does not have more than 10 employees.

Example: The craft master

A self-employed craft master is expecting a monthly loss of turnover of 40.000 DKK. from the 20th of March and until the 20th of May as an impact of the Corona virus, equal to the maximum monthly compensation. The average monthly turnover were in the financial year 2019 a 100.000 DKK. The loss of turnover is then 40 %.

With the Governments new compensation scheme the craft master therefore gets 23.000 DKK. In compensation from the state each month until the 20th of May equal to the maximum monthly compensation. The self-employed craft master will in this case get a better opportunity to maintain the basis of support in the extraordinary situation.

Application and disbursement

The companies have to apply for compensation at the Danish Business Authority portal for Companies' virksomhedsguiden.dk.

You get a link to the website here:

Temporary compensation to companies on salary for employees in risk of getting fired

Due to the effect of the COVID-19, the Government and labour markets parties have agreed on a third party agreement, which gives a temporary compensation on salary for firing menacing employees.

The Ministry of Finance, the 30th of March 2020 stated this latest news on their webpage, <https://www.fm.dk/>:

“The government and the labour markets parties agree to improve the tripartite agreement on temporary pay compensation for workers at risk of losing their jobs because of the corona crisis. In doing so, the Government and labour markets parties strengthen the safety net under the workers in the difficult financial situation caused by COVID-19.

More than 11,000 companies have already applied for pay compensation, resulting from the tripartite agreement on temporary pay compensation scheme, concluded March 14, 2020. With today's agreement, the parties agree to increase support in the existing wage compensation scheme. The purpose is to ensure that even more companies make use of the scheme so that even more employees can keep their jobs.

The maximum level of support has increased to DKK 30,000 each month. The new agreement means that the maximum level of support for both salaried (funktionær) and non-salaried (ikke-funktionærer) employees is raised from respectively 23,000 and 26,000 to 30,000 DKK. each month per covered full-time employee.

The state will continue to fund 75% of salaries for salaried employees and 90% of the salary of non-salaried employees. Other conditions for the salary compensation scheme follow the current salary compensation scheme, which was agreed upon on the 14th of March.

The strengthened temporary compensation scheme will apply from March 9 until June 9, 2020. Companies that have already applied for salary compensation are also covered by the higher level of support.

We kindly advise you to look at this webpage www.virksomhedsguiden.dk for any questions you might have and updates concerning businesses.

To your information, you might experience waiting in line on their webpage, due to the current situation. You get the link here:

The Government makes agreement with KL (Local Government Denmark) & Danske Regioner (Danish Regions)

On Thursday the 26th of March the Government, KL and Danske regioner agreed on improvements, which in the short term will help to keep the hand under the Danish economy and the Danish employees.

The agreements agrees to advance and implement planned construction investments in 2020. At the same time, there is a joined agreement on a number of measures to help solve liquidity problems at suppliers to the public sector.

The Danish economy is at this point in an extraordinary difficult situation because of the COVID-19. This requires that all parts of the private and public sector contribute to supporting Danish companies and employees.

The Government, KL and Danske Regioner have at the same time agreed on continuously keeping a dialog about the municipalities and the regions situation in relation to COVID-19. Together they will discuss the overall framework for the municipalities and regions' finances in connection with the forthcoming financial negotiations.

The agreement with KL and Danske Regioner contains these main points:

- **Anlægsloftet¹ (The built of construction) is suspended for municipalities and regions in 2020**
- **Public procurement must support businesses**
- **Advance payment**
- **Prepayment and flexibility**
- **Ongoing dialogue on operating expenses**
- **Deferral of payment of cover tax**

The government is calling on the municipalities to use the opportunity to postpone the payment to help solve liquidity problems at private companies.

To read the detailed full agreement, please visit one of these three webpages:

¹ There is no official translated English word for that. That term means to renovate, make new constructions, buildings, roads etc. In this case, the municipalities and regions normally have to stay in the budget given each year. However, due to the current situation that rule is suspended in 2020.

Aalborg Municipality aid packages for local businesses

Keep our business community alive.

Like many others, we are deeply affected by COVID-19 in Aalborg Municipality. We follow the situation carefully, take responsibility for the operation and development of our municipality and initiates new initiatives which can help our business community and retain jobs both now and in the time after.

For example, we have moved forward already planned investments, secured that municipal construction projects can continue, advanced payments to our suppliers and ensured that construction case management, guidance from Jobcenter Aalborg and BusinessAalborg works as per normally.

The Aid packages for Aalborg Municipality:

Many of the 9.200 companies in Aalborg Municipality are affected by the Corona virus/COVID-19 and several specific efforts and services are under the way to support the business community.

- **Faster payment to suppliers**

The magistrate has decided to promote the payment to companies that supply the Municipality to contribute to better liquidity in especially the small and medium-sized companies.

There are thousands of payments and therefore the injection of several millions in liquidity. Payments of DKK 115 million will be moved forward. In addition, new supplier bills of approx. 330 million DKK each month is paid as soon as possible.

- **Construction cases are still being processed**

Managing and approving building cases and permits is of great importance for the construction sector's ability to maintain a high level of activity. Aalborg Municipality's case managers are working as fast as they can to process construction applications.

The only difference is, when it comes to the uncomplicated building applications, the caseworkers now work from home with the digital processing. It is also still possible to pre-order a pre-build dialogue. The advance dialogue will now be digital only.

- **Buildings and renovations continue**

There is a strong focus on maintaining a high level of construction activity to secure local jobs in the construction industry. AaK Buildings emphasizes maintaining ongoing construction tasks and renovations. At the same time, planned projects are promoted when possible, so that we can maintain employment and benefit work in the empty municipal buildings.

Building tasks are solved of course taking into account the authorities' announced measures, so that no one is exposed to unnecessary infection risk.

- **Construction investment are moved forward**

The Budget settlement partners in Aalborg Municipality have decided to move forward renovation tasks for DKK 400 million kr. This means partly that we will get better buildings and roads in our municipality, and partly that we help create more revenue in the business community and ensure approx. 500 jobs in the construction industry.

This is based on the agreement that KL and the Government have entered into in relation to the advance of construction investments and is expected to be approved by the City Council in April.

In particular, day care centers, schools and nursing homes are given high priority in regards to renovations.

- **Offering of upcoming construction projects continues**

AAK-Buildings ensures, that planned construction projects are maintained in accordance to public offers and tendering law, so that a later vacuum and possible bottleneck is minimized.

- **Particularly efforts have been made for the retail and catering industry**

The corona virus/COVID-19 has hit the restaurant industry hard. Therefore, BusinessAalborg offers special counselling in connection with establishing, for example, take-away solutions.

Read more about that at the next sections about **BusinessAalborg** and **WE SHARE AALBORG**.

WE SHARE AALBORG

WE SHARE AALBORG

Local organizations unite in gathering Aalborg

The initiative, “WE SHARE AALBORG” intends to help citizens and local businesses keep up the city’s business community. Aalborg Municipality, VisitAalborg and Aalborg City are the initiators behind the community that will bring together the city.

The COVID-19 has put a damper on Aalborg’s vibrant business life. In order to keep Aalborg Municipal businesses running through a difficult time, three local players have come together to keep the local business community running.

Through the concept of “WE SHARE AALBORG”, Aalborg Municipality, VisitAalborg and Aalborg City will help the citizens and the local business community in Aalborg in finding each other. We Share Aalborg, functions as a community where businesses and citizens can find answers and good advice during and after the partial shutdown of the country.

“It’s a serious situation. We need to help each other through the coming time. We can do that by being available for businesses and focusing on the initiatives taken to keep the “wheels” running in the Municipality”,
says **Tonny Thorup, Business CEO at BusinessAalborg** at Aalborg Municipality.

The campaign intends to help the business community continue to make itself available to customers. It can be with the help of advice, consultation and tips for switching to online sales or inventing new concepts.

In addition, the focus is to make citizens shop locally, even though pedestrian streets are not full of life, and there are lights in fewer shop windows than usual. Many stores have launched 1:1 shopping, and others deliver goods home to the customer privately.

“We need focus on and have understanding for the situation the stores are in if we are to make it through this time as a strong trading town. Retail stores are bleeding, and the citizens of Aalborg need to remember their stores and businesses in general, even though our shopping patterns have changed these days”,
says **Aalborg City CEO, Flemming Thingbak**.

In addition to fewer shoppers, visitors and tourists are also missing from the streets. It means that the businesses and the citizens of Aalborg must work together to keep the city's opportunities running.

"Aalborg Municipality's business- and cultural life as well as the retail- and restaurant industry are unique and important for our destination. Right now, it is all about selling Aalborg to the citizens of Aalborg, if we in the future, want an attractive destination for both Danish and foreign tourists to visit. We have to do what we can to keep the "wheels running", so that we can maintain the good impression that the outside world has of Aalborg as a city and Municipality",
says **Anja Mathiasen, appointed Director of VisitAalborg**

Unemployment What to do?

If you unfortunately have lost your job due to the COVID-19 virus we have made a list of things you must do.

For persons entitled to unemployment benefit:

1. As a newly unemployed, you have to inform your local job center about your status and contact your trade union.
2. You can also register your unemployment at jobnet.dk.
3. To apply for unemployment benefits you have to contact your A- kasse (unemployment insurance fund).

For persons not entitled to unemployment benefit:

If you are not entitled to get/receive employment benefits, you can apply online for cash benefits using this link:

borger.dk

We have made a small intro on how to get stated on the webpage.

The screenshot shows the borger.dk homepage with several annotations:

- 1. Log on with your NEM-ID**: A box with an arrow pointing to the "Log på" button in the top right navigation bar.
- Vælg kommune**: A label with an arrow pointing to the "Vælg kommune" dropdown menu.
- 2. Choose your Municipality (Vælg Kommune)**: A box with an arrow pointing to the dropdown menu.
- And press the "move on button" (videre)**: A box with an arrow pointing to the "Videre" button next to the dropdown menu.
- 3. Then just follow each step and fill out the form for cash benefit.**: A box with a circular arrow icon, indicating the next steps in the process.

Additional text on the page includes a notice about public authorities not operating normally due to COVID-19 and a breadcrumb trail: "Hjem / Vælg kommune".

Unemployment Municipalities and Jobcenter offices in the Region of North Jutland

We cannot promise that you get granted your cash benefit. It depends on many factors. For instance your income, your current situation, family relations etc. However, you might be able to receive other forms of benefits, such as housing benefit.

Therefore, we advise you to contact your local Municipality and the department for cash and social benefits and explain them your current situation.

See our list below for addresses and numbers for the municipalities and jobcenter offices in the Region of North Jutland.

Information for citizens concerning employment efforts and benefits

What does the temporary suspension of the employment efforts of the Jobcenter and A-kasse (Unemployment Insurances) mean?

The Premier Minister decided on the 11th of March 2020 that all public employees, who do not work with critical functions, should work home as much as possible. A national prevention in order to limit spreading of the COVID-19 disease.

Danish Agency for Labour and Recruitment have based on these conditions temporarily suspended the active employment effort at the Jobcenter and unemployment insurance agencies. As an unemployed you still receive your benefits as usual. For instance, unemployment benefits and cash benefit.

For unemployed the active effort in the form of conversations or active offers as a starting point set and you will not be sanctioned for not participating. However, the jobcenters may, after specific assessment and in consultation with you, choose to continue certain parts of the effort, for example, to continue business or telephone conversations, for example continue a business course or telephone conversations/meetings.

Please note, as an unemployed you still should apply for a job even though the unemployment effort is suspended. Right now, lines of industries are in need of more employees due to the course of the situation right now, for instance the health care system.

The jobcenters are also still able to match you with employers who seek employees. However, in the suspension period you will not be sanctioned if you do not apply for jobs or refuse to take a job offer for employment.

If you get unemployed in the coming period, you can as usual register yourself as unemployed at **jobnet.dk** or by contacting your local Jobcenter and unemployment insurance agency if you are a member.

You have to update your CV (resume) or make one if it is your first time at jobnet
You find the link for Jobnet here:

Beneficiaries and sickness benefit recipients

The outbreak of the Corona-virus means that Denmark in many ways shuts down. This has a great impact on beneficiaries who can lose their benefit. They are having difficulties finding jobs when companies are considering firing rather than hiring.

For sickness benefit recipients a suspension of the work of the jobcenters and the priorities in the health care system, that it can be difficult to initiate follow-up and get the citizen clarified medically.

The government and the parties of parliament therefore put the unemployed seniority on hold until the 9th of June and postpone the right for sickness benefit for citizens who otherwise would lose the right during the crisis.

Unemployment beneficiaries:

This means, that the period from the 9th of March and until the 9th of June 2020 does not count for the seniority for the unemployed and the unemployed can receive benefit up to three more months.

A condition for being part of this is that the citizen is a member of an employment insurance (A-kasse) until the 9th of June 2020.

The citizens who have used their right to benefit will be able to resign in their employment insurance and in that case get the right to receive unemployment benefit for the same period until the 9th of June as long as they are employment insurance members in the whole period.

Sickness beneficiaries:

Sickness beneficiaries will get the period of benefit postponed with three months if they at the time of the re-evaluation period from the 9th of March and until the 9th of June cannot extend the payment of sickness benefit under the extension rules.

In this period, there will be no persons at the time of the re-evaluation point that attends a job clarification course on resource loss performance.

The scheme also applies to persons for whom the right to sickness benefit ends due to a rule of extension and otherwise would transition to job clarification with resource loss performance. In order to be entitled to the extension the citizen must be a sickness beneficiary at the 9th of March 2020.

For students

The extension of the quarantine period due to COVID-19

The extension also has an impact on the approx. 250,000 students and employees in higher education, who were sent home on 13 March 2020.

The period at home was initially for two weeks and is now extended up to and including 13 April 2020.

Since the closures, the Ministry of Higher Education and Science has established multiple dialogue fora across the sector, where significant challenges associated with the current situation have been discussed in close dialogue with the educational institutions.

For example, challenges around exams, internships, SU and students who are close to completing their education.

These dialogues will continue as the closure period is extended.

Students may have many concerns and doubts during the current situation. And it is important that they have clarity about their own situation. If any students have concerns about their education, they should contact their educational institution.

**Ministry of Higher
Education and Science**

**Danish Agency for Institutions
and Educational Grants**

For students

Increased student loan opportunities

Today students at youth educations and higher education's receive SU scholarships and SU loans.

With the present SU rules students can receive a loan up to 3.194 Danish kr. each month. In addition, many have an income next to school and studies.

Because some students are at risk of losing their student job because of the COVID-19 there are plans to extend the possibility of raising SU loans for students up to the amount of 6.388 Danish kr. in addition to their scholarship and existing option for SU loans.

This means, that the extension will give the amount of 9.582 Danish kr. each month in SU loan equivalent to two months of extra SU loan. Envisaged that the extension will apply to both scholarship recipients and students who have been late and therefore receive final loans. The final loan therefore is extended from DKK 8,241 each month to DKK 14,602 each month.

The proposed extension of the loan options therefore means that SU recipients who may lose their job because of COVID-19 will be able to maintain the same monthly disposable income. In principle, this right applies to March and April 2020.

The right is extended to the extent that the situation requires it. The opportunity is provided via the digital application systems as soon as possible.

The proposed extension of the loan options therefore means that SU recipients who may lose their job because of COVID-19 will be able to maintain the same monthly disposable income.

In principle, this right applies to March and April 2020. The right is extended to the extent that the situation requires it.

The opportunity is provided via the digital application systems as soon as possible.

If you need more information or have questions about your education and the effect of it because of the Corona virus/COVID-19 please visit the webpage for the Ministry of Higher Education where you find FAQ about SU and the latest news according to the effect of the Corona virus/COVID-19 and SU.
